Prashant Tanwar

Full Stack Developer

Kitchener, ON | 6478860229 | prashanttanwar124@gmail.com

As a Full Stack Engineer, I build and maintain responsive websites for various clients across different sectors, using JavaScript, VueJS, ReactJS, Laravel, NodeJS, MongoDB, MySQL, UI/UX, Shopify, and Flutter. I have consistently received high user experience scores for every web development project.

WORK EXPERIENCE

Software Engineer - Brandshark, Bangalore, IN

- Developed Lanceark, a robust keyword-tracking web application tailored for digital marketing agencies.
- Designed to track client data and monitor content management systems efficiently.
- Implemented accurate keyword tracking and analysis, empowering agencies to make informed, data-driven decisions.
- Collaborated closely with team members to gather feedback and iteratively improve the application's functionality and user experience.
- Allows automated social media posting, enhancing overall marketing efficiency and effectiveness.
